3120 Assignment
E2 DigitExtractor
Create a digit extractor application that prompts the user for an integer then displays the ones tens, and hundreds digit of the number.
How has your program changed from planning to coding to now? Please explain?
Fixed the if statement accepting the user string
First 2 methods, still woking on second one

Credit

hanged this	

So now it wont keep asking for int input

CREATED rest of methods

	lived the meth
