Errors
What caused the error and how do you overcome the error?

Code would not accept userinput no matter what, fixed now

```
33          while (true) { //loop incase user inputs something other then whats listed
34              System.out.println("Please input the number of your option.");
35              System.out.println("1. Show total in bank.");
36              System.out.println("2. Add pennies.");
37              System.out.println("3. Add nickels.");
38              System.out.println("4. Add dimes.");
39              System.out.println("5. Add quarters.");
40              System.out.println("6. Take money out of bank.");
41              System.out.println("Enter 0 to quit.");
42              String strselection = scanner.nextLine(); //accepts input
43              System.out.println(strselection);
44
45              try {
46                  selection = Integer.parseInt(strselection);
47              } catch (Exception e) {
48                  System.out.println("Something went wrong. Please try again.");
49                  continue;
50              }
51
52              //if the user inputs anything other then the listed options it will loop and restart the asking process
53              if (selection == 1) {
54                  spot.displayTotalMoney();
55
56              }else if (selection == 2) {
57
58
59              }else if (selection == 3) {
60
61
62              }else if (selection == 4) {
63
64
65              }else if (selection == 5) {
66
67
68              }else if (selection == 6) {
69
70
71              }else if (selection ==  0) {
72
```
